REPORTED EXECUTIONS AT BUDAPEST PROVE UNTRUE

VIENNA, April 17 (By the Assuciated Press.)—Reports of the executions at Budapest of Count Michael Karolyi. Archduke Joseph and others are untrue. The city continues outwardly quiet with progress being made toward the nationalization of property.

It is estimated there are only 20 naturalized Americans and American wives of Hungarians in Hungary. It is possible that an effort will be made to send food there. There is little meat and few vegetables in the hotels and there is no sait. Eggs are plentiful while the bread sold in the city is worse than that on the market here.

When Count Karolyi was in Visnas he called on Prof. Philip Brown, secretary of the American mission here, and told him that he would be glad to except a can of condensed mits. He finds socialism a difficult program and was much downcast when here partly because he felt he was padly treated by the allies and partly because he is hated by the aristocratiz of Hungary, who charge him with peraying them

PAYS MORE TAXES THAN HIS INCOME

Double Charges of U. S. and England Over 100 Per Cent of Peer's Wealth.

LONDON, April 17. (Correspondence of the Associated Press.)-That a man should pay more for income tax than the total of his income seems the limit

This is said to be the plight of a well-known British peer, who was born as American and became naturalized in England some years ago, His property is in the United States. Being a British subject he is compelled by British subject he is compelled by British is aw to pay income tax on all his revenues from all sources, and the American law compels payment of income tax on all his income from American property. Being a multimilionaire his income is subject to heavy supertax by both governments and the two taxes are said to amount to more than 100 per cent of the income. Thus the unfortunate alleman must pay out all of his receipts and dip into his capital to defray current taxes and, after defraying this first charpe, use more of the capital for living expenses.

The double income tax of the war period has hit well-to-do Americans who live in Great Britain very hard. In former days very few of the large colony of American business men living in Britain ever gave up their American citizenship. But many of them have found this draft on their patriotism too heavy and have reductantly changed their alleriance and taken out naturalization papers.

As for those Americans who lived

their allegiance and taken out beturni-aation papers.

As for those Americans who lived here because they found the social at-mosphere of England mure congenial and the scope for spending money on pleasures greater than at home, most of them seem to have disappeared.

these latter included 100 pigeous captured from the Germans, and some of these Hun flyers still had attached at their necks the messages they bere when taken prisoners. The boche birds were distinguished by leg markers embossed with profiles of former Emperor William.

One of the pigeons, one leg missing, returned honored with a recommendation for the distinguished service cross for services with the lost battalion. This bird, "Cherami" by name, made nine flights through heavy fire, and a bullet scar on the breast further attested the bird's "heroism."

When "Cherami," the lost battalion's pigeon hero, was picked up with a leg shattered while flying through a barrage, the globule containing its message was intact. At a base hospital Gen. Pershing came to see the bird, and he ordered that the highest medical skill be afforded to save its life. "Polit," another pigeon, lost a leg while on duty with the tanks and was cited for "bravery." "President Wilson" returned with its right eye shot out, presumably by a bit of shrappel, an injury received while carrying a message telling of the location of a machine gun nest.
